

RUBBER BELT TUMBLE BLASTER

Kresco's rubber belt tumble blaster delivers efficient, affordable batch processing and automated cleaning, peening and finishing of small workpieces.

COMMON APPLICATIONS

Rubber Belt Tumble Blasters automate the cleaning, peening, and finishing of small workpieces. With certain types of parts, no other finishing method can compare to these heavy-duty machines in terms of speed and quality results.

This system is designed for batch-type production of relatively small parts that can withstand being tumbled and bumped into one another (hardware, forged parts, molded parts, etc.).

Before

After

HOW IT WORKS

Simply load the parts onto the perforated rubber belt, set the precision timer to the desired output, and let the rubber belt blaster do the work.

The parts will be held in a tumble motion on the rubber belt, randomly exposing their entire surfaces to the abrasive jets above.

When the process is over, simply open the front door unloading chute and collect the parts in a container or load them on a conveyor on their way to the next manufacturing process.

KEY FEATURES

PLC WITH USER HMI INTERFACE

Critical component operations are fully automated through a Programmable Logic Controller (PLC) with a Human-Machine Interface (HMI) touch screen. The PLC displays ongoing and resolved alarms for smooth functioning of the machine.

- **Main Screen:** Simple user interface for everyday operations and parameters
- **Alarm Screen:** Displays ongoing and resolved alarms history
- **Manual Screen:** Password-protected screen for maintenance personal
- **Maintenance Reminders:** Integrated maintenance program with reminders

EFFICIENT MEDIA RECOVERY SYSTEM

To optimize your process and reduce your overall cost

Our automated systems are delivered with a **tunable cyclonic media separator** that uses the centrifugal force to separate dust and fine particles (paint chip, rust, scattered media, etc.) from abrasive media still in perfect working condition to be reuse again.

Our unique design can process angular and spherical **abrasive media of various materials, granulometries, and bulk densities**. Its stand-alone support can accommodate different floor layouts and arrangements.

Cyclonic Separator

- 1 Dust, dirt and debris drawn out by the dust collector
- 2 Contaminated media mix from the sandblast cabinet
- 3 Adjustable air inlet to accommodate various types of media
- 4 Large debris dust drawer
- 5 Storage hopper available in different capacities
- 6 Abrasive media in good condition returned to the sandblast cabinet

Media Recovery System Specifications

	RB16	RB24	RB30
Body Diameter	16"	24"	30"
Air Flow (CFM)	900 CFM	1,200 CFM	1,800 CFM
Inlet ID	5" / 6"	6" / 7"	7" / 8"
Outlet ID	7"	8"	8"
Storage Hopper	Custom to each order based on the application and the production target		

POWERFUL CARTRIDGE DUST COLLECTOR

For a dust-free operation and environment

All our automated systems are delivered with a **powerful, self-cleaning cartridge-type dust collector** available in different filtration capacities according to your process requirements and cabinet dimension.

Dust Collectors Line Overview

	CDC900	CDC1200	CDC1800
Motor (HP)	2 HP	3 HP	5 HP
Fan (CFM)	900 CFM	1,200 CFM	1,800 CFM
Filter Cartridges	2	4	4
Filter Capacity	636 sq.ft.	1,272 sq.ft.	1,272 sq.ft.
Overall Dimensions (L x W x H)	48" x 23" x 120"	48" x 45" x 124"	48" x 45" x 124"
Shipping Height*	90"	94"	94"
Fan Muffler (db)	Under 80		

* Adjustable legs to be assembled on site

About Kresco

Kresco designs, manufactures, and supports industrial equipment for the surface treatment industries. **Kresco** has standard equipment designed for most applications and can customize equipment to meet or exceed your production expectations.

Sandblasting

- Sandblast Booths
- Sandblast Cabinets
- Automated Sandblasting Systems
- Abrasive Reclaiming Systems
- Pressurized Sandblasters
- Dust Collectors

Solvent Recovery

- Batch Solvent Distillers
- Continuous Flow Solvent Distillers
- Oil Cooling Systems

Shotblasting

- Roller Conveyor Blaster
- Rotary Table Blaster/Swing Table Blaster
- Spinner Hanger (Batch)
- Continuous Flow with Monorail
- Rubber and Steel Flight Tumbler Blasters
- Flow Thru Barrel Blasters
- Mesh Belt Continuous Blasters
- Monorail System Blasters
- Rim Blasters
- Preservation Line

Parts & Consumables

- Blast Nozzles
- Blast Hoses
- Abrasive Media
- Air Valves
- Abrasive Metering Valves
- Cartridge Filters
- Sludge Bags
- Safety Equipment & PPE

Painting

- Paint Spray Booths
- Powder Coating Booths
- Drying Ovens
- Air Make-Up Units

Services

- Turnkey Project Design
- Custom Design
- Full Installation
- Start-up Supervision
- Training
- Maintenance
- Retrofit & Upgrade

All systems are designed to build and they are manufactured with the highest quality standards in our manufacturing shop in Quebec, Canada.
