

LEATHER SANDBLAST GLOVES

DATA SHEET

Description

Kresco's sandblast cabinets gloves are made from natural rubber gauntlet and fleece lined in the inside for comfort.

A heavy-duty leather sleeve is attached to the gauntlet and allows for multiple configurations to fit most sandblasting cabinets.

These gloves are intended for dry sandblasting and offer good chemical resistance.

Features

- **Palm Finish:** Rough Finish (HD) or Smooth Finish (RC)
- **Liner:** Fleece
- **Color:** Black and red
- **Structure:** Glove made with a 18" natural rubber glove attached to a leather sleeve.

	Gauge: 40 mil
	Material: 100% natural rubber from coagulated natural latex
	Operation temperature: -25°C to 70°C
	Meet the norm EN420 (general requirements).
	Meet the norm EN374 (chemical and micro-organic hazards).
	Abrasion resistance (according to EN388): Level 4
	Cut resistance (according to EN388): Level 1
	Tear resistance (according to EN388): Level 4
	Puncture resistance (according to EN388): Level 1

Storage Cleaning

Base glove is made with 100% natural Rubber. Natural Rubber will always react to the oxygen in the air and to sunlight. Clean with mild detergent, dry and store in a cool, dry place away from heat sources.

Warning

This product contains natural latex which may cause allergies.

Code	Length	Port Size	Hand Size	Finish	Color
